

To Whomever It May Concern

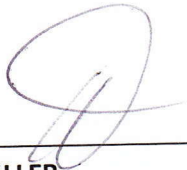

REFERENCE LETTER – LILYDOME WATERLESS URINAL WASTE SYSTEM

We have had the Lilydome Waterless Urinal Waste System installed at the Terraces, Sovereign Quays and 33 Bree for approximately three years and we are extremely satisfied with the performance of this system.

We have found the Lilydome system to be cost effective and very easy to maintain. Absolutely no chemicals and/or water are required and the Lilydome elements are replaced every six months by our cleaning staff.

The Lilydome system solves the problem of foul-smelling urinals and ensures that the urinals are hygienic and odour-free. It reduces both the frequency of urinal blockages and the maintenance required on expensive flush valves, bottle traps etc.

We have no hesitation in recommending the Lilydome system to any company looking for a “green”, cost effective, efficient solution to their urinal issues.
